

A.) Representative Treatment Group Patient

A, B random in stroma

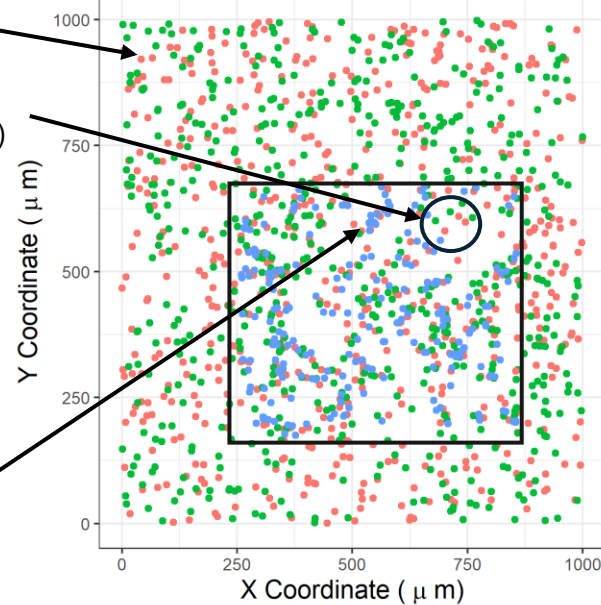

A, B colocalized in tumor
(disc kernel radius = σ_B or $\sigma_B + \delta_B$)

Cell Type

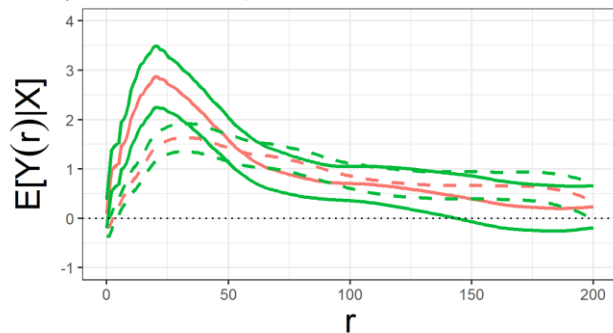

- A
- B
- T

A, T colocalized in tumor
(disc kernel radius = σ_T)

B.) Representative Control Group Patient

C.) Overall Image Colocalization Curve

— 95% Confidence Band

— Estimated $E[Y(r) | X]$

-- Control Group

— Treatment Group

D.) Colocalization Curve in Stroma Regions
